

Industrial Video & Control Unveils World's First Commercially Available 4K Explosion Proof PTZ Video Camera

Designed for the Aerospace and Defense Industries, the APTZ-3045-10 Delivers Broadcast Quality Video In Hazardous Areas

Newton, MA — September 29, 2020 — Industrial Video & Control (IV&C), a global provider of industrial video solutions, has introduced the APTZ-3045-10, the first commercially available 4k 6G-SDI PTZ video camera for hazardous areas. The APTZ-3045-10 is ideal for industrial applications in the aerospace and defense industries where users require the highest quality video for live monitoring and post-event video playback.

“The APTZ-3045-10 makes it possible to monitor equipment, personnel, and processes in minute detail, in locations classified as hazardous,” said Michael Hrinishin, technical sales administrator at IVC. “For example, in the aerospace industry, the APTZ-3045-10 can operate under the extreme conditions on a space launch pad — heavy shock, high heat, and volatile gases — while delivering broadcast-quality video of critical processes. The camera is also suitable for scientific testing, fabrication, refueling, and ballistics applications.”

The APTZ-3045-10 is a rugged, outdoor, pan/tilt/zoom color video camera with a 20x optical motorized zoom. It delivers 4k resolution, 6G-SDI image stabilized video, and outstanding low-light performance in difficult conditions. Housed in a 316L electropolished stainless steel enclosure, the camera is certified for Class I Division 1 environments.

IVC's line of Class I Division 1 certified video cameras are designed for areas where ignitable concentrations of gases or vapors exist. Devices classified as Class I Division 1 must be explosion proof — incapable of igniting flammable or combustible material in the atmosphere by way of their enclosures and build design. The APTZ-3045-10 was tested and certified by Intertek.

The APTZ-3045-10 is available immediately from Industrial Video & Control.

About Industrial Video & Control Company

Founded in 2001, Industrial Video and Control is a leading supplier of cameras and video systems specifically designed for industrial applications. An ISO 9001 certified company, IVC provides IP-based video solutions by combining high-quality cameras, enclosures, and software for industrial, commercial, and military applications. IVC's success in the market has been driven by high-quality products, cost-effective solutions, and outstanding service. Based in the greater Boston area, IVC provides industrial video solutions to customers around the globe.
