IVC Introduces Wireless Camera Solution for Hazardous Areas

Newton, MA – March 28, 2019 – Industrial Video & Control (IVC) today announced that it is now shipping its latest X-Series product – the AMZ-HD42-1.

IVC's AMZ-HD42-1 is a fixed HD video camera that includes a motorized 4x zoom. The camera is certified for use in Class I Division 1 environments and is housed in a small form factor 316L stainless steel enclosure. This IP camera solution includes an integrated 802.11a/b/g/n radio, making installation quick and easy.

“We continue to see the upward trend towards wireless automation in the industrial market sector,” stated Dipak Sagar, Business Development Manager for IVC. “The demand for certified cameras for process, security and safety monitoring, particularly in the petrochemical industry, continues to be strong. This new product is a natural evolution of our certified camera offering.”

Bill Richards, IVC's Vice President of Operations, added: “Our wired AMZ products have been our most popular products for several years. We invested in the development of this product to meet the increasing demand for certified wireless cameras.”

IVC's certified fixed and PTZ camera products are engineered and manufactured in the United States. These products are certified for use in hazardous areas. The AMZ products are small form factor fixed HD cameras that are available in aluminum or stainless-steel enclosures. IVC's APTZ HD stainless steel cameras include 360° pan and 180° tilt operation. The X-Series products are available as analog and IP cameras. All cameras are compatible with IVC video management software, which provides remote camera configuration and viewing. This software is also useful for integrating video into DCS or SCADA systems.

IVC's AMZ-HD42-1 is available for purchase globally from IVC authorized distributors including Anixter, Graybar, Rexel, WESCO, and W.W. Grainger.

About Industrial Video & Control Company

Founded in 2001, Industrial Video and Control is a leading supplier of video cameras and video management software specifically designed for industrial applications. The company's IP-based video solutions are used by customers worldwide for process evaluation, remote monitoring, personnel safety, site security, and regulatory compliance.
