

**FOR IMMEDIATE RELEASE**

## **IVC to base MobileVision operations in Greenville, SC**

**Newton, MA – January 30, 2017** – Industrial Video & Control (IVC) has announced its plan to operate the manufacturing and sales activities for its newly established MobileVision product line out of a facility in Greenville, SC.

Jennifer Williams, who was formerly with Netvision 360, will become IVC’s Director of MobileVision products sales. She commented: “IVC will provide a strong engineering and support organization and enable us to grow MobileVision product sales from our facility in Greenville. Our goal will be the delivery of the highest quality Made in America products to the mobile and remote surveillance market”.

Norman Fast, IVC’s CEO, added: “This is a great opportunity to jumpstart our MobileVision product line with an experienced, talented team. We are committed to serving our customer base with the combination of remote and on-site support, which has been our hallmark.”

IVC’s MobileVision product line will include a full range of trailer mounted cameras on extendable masts. These products will be highly customizable with a variety of video imaging technologies, connectivity, and power options. MobileVision systems are designed to essentially be plug-and-play; as soon as the units are deployed and powered, remote users will be able to view live video. The systems are shipped preconfigured and ready for deployment on leading broadband cellular networks. They are well-suited for applications that require temporary high-quality, remote video surveillance, such as construction sites, public events, incident monitoring, or emergency management.

### **About Industrial Video & Control Company**

Founded in 2001, Industrial Video and Control is a leading supplier of video cameras and video management software specifically designed for industrial applications. The company’s IP-based video solutions are used by customers worldwide for process evaluation, remote monitoring, personnel safety, site security, and regulatory compliance. IVC’s success in the market has been driven by high-quality products, cost-effective solutions, and outstanding service. Based outside Boston, MA, IVC is an ISO 9001-certified company.
